EDUCATION

Self-Directed Learning

The Odin Project
2024 - 2026
Full Stack Web Development

University

University of Buea
2019 - 2022
B.Tech in Mechanical Engineering

AWARDS & CERTIFICATIONS

- Advanced React — Meta, 2024
- Programming with JavaScript — Meta, 2023
- Version Control — Meta, 2024
- HTML and CSS in depth — Meta, 2024

SKILLS

- React.js
- Vitest
- Javascript
- Jest
- HTML & CSS
- API Integration
- DOM manipulation
- Webpack
- Critical thinking and problem-solving

PROFILE

Self-taught front-end developer transitioning from mechanical engineering into software development. I specialize in building responsive, interactive user interfaces using HTML, CSS, Javascript, and React.js - with strong focus on clean UI, state management, and writing tested, maintainable code.

PROJECTS

Shopping Cart - 2025

React, Vitest, Javascript, API Integration, HTML, CSS

- ***Implemented React Context API to manage cart state*** globally, enabling real-time updates across product pages, cart view, and checkout.
- ***Configured React Router for multi-page navigation***, enabling users to browse products, manage cart items, and checkout without page reloads.
- ***Integrated FakeStore API*** to dynamically fetch and display real product data, and utilized lucide-react for consistent icon styling throughout the application.
- ***Wrote unit tests*** using Vitest to validate component behavior, ensuring cart operations (add, remove, update quantity) work correctly.

BattleShip - 2025

Javascript, Jest, HTML, CSS, Webpack, DOM manipulation

- ***Architected a complete turn-based game*** with dual 10x10 game boards, implementing complex coordinate validation and ship placement logic.
- ***Engineered ship placement algorithms*** with boundary checking and collision detection, supporting four directional placements.
- ***Implemented AI opponent logic*** with randomized attacks and MutationObserver for automatic turn management.
- ***Built hit/miss detection*** with real-time board updates, ship tracking, and win/lose conditions.
- ***Wrote unit tests using Jest*** to validate core game mechanics, including ship creation, board state, and attack validation.
