SUMMARY

Full-Stack Developer dedicated to building scalable, high-performance web applications. Proficient in designing decoupled architectures and robust **APIs** using **Node.js**, **React**, and **PostgreSQL**. Proven ability to translate complex product goals into seamless user experiences and reliable backend workflows.

PROFICIENT SKILLS & TOOLS

- **Frontend:** React.js, JavaScript (ES6+), HTML5, CSS3, Context API, Webpack, CSS Modules.
- **Backend:** Node.js, Express.js, RESTful APIs, JWT, Passport.js
- **Database & ORM:** PostgreSQL, Prisma.
- **Tools & DevOps:** Git, GitHub, Jest, Postman, Cloudinary, CI/CD, GitHub copilot, Claude AI, Qwen AI.

PROJECTS

Odin-Book : A Social Media Application | React, Node.js, Express, PostgreSQL, Faker.js and more

- **Designed and maintained** robust backend RESTful APIs using Node.js and Express, implementing a security-first architecture to manage complex relational data flows.
- **Built a highly responsive user interface** with React, utilizing Context API and custom hooks for state management to ensure a seamless and maintainable frontend.
- **Architected relational database** schemas and optimized SQL queries in PostgreSQL using Prisma ORM, ensuring high data integrity across users, posts, and comments.
- **Accelerated development cycles** and improved overall code quality by leveraging AI coding assistants for continuous refactoring, automated test generation, and complex debugging.
- **Implemented strict authentication** and authorization protocols using JWT and Passport.js, aligning with enterprise best practices for secure application delivery.

Messaging Application | React, Node.js, Express, PostgreSQL, Prisma and more

- **Designed and developed** a full-stack messaging application, utilizing a React frontend and a Node.js/Express backend to facilitate secure and reliable data transmission.
- **Architected an optimized relational database** schema in PostgreSQL using Prisma ORM to efficiently manage complex queries across users, active conversations, and message histories.
- **Applied a security-first approach** to the backend architecture, implementing robust data validation, error handling, and authentication logic to protect user data privacy.
- **Accelerated feature delivery** and improved code maintainability by incorporating AI coding models into the daily workflow for test generation, boilerplate reduction, and logic refactoring.
- **Collaborated on end-to-end** feature delivery within a Linux-based development environment, demonstrating strong debugging and troubleshooting skills across the application stack.

EDUCATION

Full Stack Web Development

Mar 2024 – Mar 2026

The Odin Project

B.Tech in Mechanical Engineering

Sep 2019 – Dec 2022

University of Buea

CERTIFICATIONS

- Advanced React – Meta, Coursera – Feb 15, 2024
- HTML and CSS in depth – Meta, Coursera – Jan 30, 2024
- Programming with JavaScript – Meta, Coursera – Dec 18, 2023
