SUMMARY

Full-Stack Developer dedicated to building scalable, high-performance web applications. Proficient in designing decoupled architectures and robust **APIs** using **Node.js**, **React**, and **PostgreSQL**. Proven ability to translate complex product goals into seamless user experiences and reliable backend workflows.

SKILLS

- **Frontend:** React.js, JavaScript (ES6+), HTML5, CSS3, Context API, Hooks.
- **Backend:** Node.js, Express.js, RESTful APIs, Authentication (JWT, Passport.js).
- **Database & ORM:** PostgreSQL, Prisma ORM, Data Modeling.
- **Tools & DevOps:** Git, Unit Testing, Integration Testing, Cloudinary, Postman.

PROJECTS

Odin-Book : A Social Media Application

Feb 2026 – Present

- **Developed** a full-stack Single Page Application (SPA) utilizing **React** for a highly responsive frontend and a **RESTful Node.js/Express** API to manage complex data flows.
- **Architected** complex relational database schemas in **PostgreSQL** using **Prisma ORM**, managing intricate relationships between users, posts, and comments while ensuring data integrity through automated seeding with **Faker.js**.
- **Strengthened** application security by implementing robust authentication and authorization protocols using **Passport.js** and **JWTs**, significantly reducing unauthorized access risks.
- **Streamlined** user onboarding by developing custom guest-login middleware, allowing for frictionless portfolio exploration without immediate registration hurdles.
- **Optimized** application performance and state management through the implementation of custom React hooks and the **Context API**, while integrating **Cloudinary** to handle efficient, scalable media uploads.

Where is Waldo : A Photo Tagging Game

Jan 2026 – Feb 2026

- **Architected** a decoupled client-server architecture using **React** and **Node.js** to ensure seamless synchronization between user targeting inputs and backend game logic processing.
- **Eliminated** client-side cheating vulnerabilities by implementing rigorous server-side coordinate validation using **Prisma ORM** and **PostgreSQL**, ensuring all character captures were verified against the database.
- **Engineered** a high-precision scoring engine that tracks millisecond-accurate start/end times to generate real-time, competitive leaderboards for an engaging user experience.

EDUCATION

Full Stack Web Development

Mar 2024 – Mar 2026

The Odin Project

B.Tech in Mechanical Engineering

Sep 2019 – Dec 2022

University of Buea

CERTIFICATIONS

- Advanced React – Meta, Coursera – Feb 15, 2024
- HTML and CSS in depth – Meta, Coursera – Jan 30, 2024
- Programming with JavaScript – Meta, Coursera – Dec 18, 2023
