

SKILLS

CAD

- **SolidWorks, Fusion 360**, and **FreeCAD** were used on various projects involving **FEA Analysis**, **3d design**, and **assembling of mechanical parts**.
- **FreeCAD, SolidWorks**, and **Fusion 360** were used to draft 2D engineering drawings

MECHANICAL

- Created 3D models of **sheet metals**.
- **Technical drawing** for hand sketch up before cading.
- Using **engineering working tools** such as a **drilling machine**, **filling machine**, **measuring tools**, etc.
- **Machine Design Part** skill with certification.
- knowledgeable on the **parts of an automobile**.

Other Mechanical Skills

- Manual arc welding, gas welding, hot and cold forging, etc.

PROJECTS

MANUAL GEARBOX

- Allow for the changing of gears via a shift stick.

DIFFERENTIAL

- Allows the outer and inner wheel to travel at different speed

EDUCATION

UNIVERSITY OF BUEA

B.Tech in Mechanical Engineering
2019 - 2022

- 2nd Class Upper Student
- Overall GPA: 3.09

EXPERIENCE

Fanso Peter Garage

Aug 2021 - Sep 2021

Internship Trainee | Limbe I, Fako, SW Region, Cameroon

- **Cleaning** and applying **lubricants** to machinery components.
- Replacing **Brake pads** and **Clutches** of trucks.
- Assisted in **rebuilding** broken-down engines of trucks.
- Using tools and equipment such as a wrench, hammer, chisel, hex key, hydraulic jack, screwdriver, etc.
- Repair a broken wing spring by adjusting it in place and welding it together.

ALPHA MARINE SHIPPING SERVICES LIMBE

Aug 2020

Internship Trainee | Limbe III, Fako, SW Region, Cameroon

- **Cleaning** and applying **lubricants** to machinery components.
- Assist other crew members with **maintenance** or **repair** duties.
- Observe and learn from the crew members and experts on board.
- Keeping **records** of all maintenance and repair work performed on the ship.

LICENSES & CERTIFICATIONS

Autodesk Fusion 360 Integrated CAD/CAM/CAE

June 2023

Autodesk | Coursera

- **Sketching** and **modeling** are the essential features of any CAD program.
- Fusion **Sculpt** to create smooth and precise curved 3D modeling surfaces. With Fusion 360 **sheet metal** features, you can design for manufacturing right from the start, creating a flat pattern for sheet metal design projects.
- From aesthetic photo-realistic **renders** to assembly **animations** showing how a design works to technical **drawings** for manufacturing.
- Fusion 360 **Simulation** features are highly accurate, fast, and powerful and can help you better understand how functional a design is and ways in which to improve it.
- <https://www.coursera.org/account/accomplishments/certificate/WHJT64JRHH58> - Credential URL

Machine Design Part I

May 2023

Georgia Institute of Technology | Coursera

- **Material properties in design**, such as strength, modulus of elasticity, and the coefficient of thermal expansion.
- **Static Failure Theories** involve; Static Loading, Factor of Safety, Axial and Torsional Stress, Bending Stress, Stress Concentration Factors, Distortion Energy Theory, and Brittle Coulomb Mohr Theory.
- **Fatigue Failure** includes topics like; Fatigue and the SN Curve, Estimating the Endurance Limit, Fatigue Stress Concentration Factors, Fully Reversed Loading, Fatigue Fluctuating Stress, Fatigue Goodman Diagram, Randomly Varying Stresses, and Miner's Rule.
- <https://www.coursera.org/account/accomplishments/certificate/46EXMENCMDK> - Credential URL

EXTRACURRICULARS

- Working at my parents' print shop.
- Playing football (soccer).
- video gaming.
